Ordered Alphabetically 5 = Tag added in HTML5.

Tag		Description
<u><!--</u--></u>		Defines a comment
		Defines the document type
<u><a></u>		Defines a hyperlink
<abbr></abbr>		Defines an abbreviation
<acronym></acronym>		Not supported in HTML5. Use <abbr> instead. Defines an acronym</abbr>
<address></address>		Defines contact information for the author/owner of a document
<applet></applet>		Not supported in HTML5. Use <object> instead. Defines an embedded applet</object>
<area/>		Defines an area inside an image-map
<article></article>	5	Defines an article
<aside></aside>	5	Defines content aside from the page content
<audio></audio>	5	Defines sound content
<u></u>		Defines bold text
<base/>		Specifies the base URL/target for all relative URLs in a document
<base/>		Not supported in HTML5. Use CSS instead. Specifies a default color, size, and font for all text in a document
<bd><bdi><</bdi></bd>	5	Isolates a part of text that might be formatted in a different direction from other text outside it
<bdo></bdo>		Overrides the current text direction
 big>		Not supported in HTML5. Use CSS instead. Defines big text
 		Defines a section that is quoted from another source
<body></body>		Defines the document's body
		Defines a single line break
<button></button>		Defines a clickable button
<canvas></canvas>		Used to draw graphics, on the fly, via scripting (usually JavaScript)
<caption></caption>		Defines a table caption
<center></center>		Not supported in HTML5. Use CSS instead. Defines centered text
<cite></cite>		Defines the title of a work
<code></code>		Defines a piece of computer code
<col/>		Specifies column properties for each column within a <colgroup> element</colgroup>

<colgroup></colgroup>		Specifies a group of one or more columns in a table for formatting
<command/> 5		Defines a command button that a user can invoke
<datalist></datalist>	5	Specifies a list of pre-defined options for input controls
<u><dd></dd></u>		Defines a description/value of a term in a description list
		Defines text that has been deleted from a document
<details> 5</details>	5	Defines additional details that the user can view or hide
<dfn></dfn>		Defines a definition term
<dialog> 5</dialog>		Defines a dialog box or window
<dir></dir>		Not supported in HTML5. Use instead. Defines a directory list
<div></div>		Defines a section in a document
<u><dl></dl></u>		Defines a description list
<dt></dt>		Defines a term/name in a description list
<u></u>		Defines emphasized text
<embed/>	5	Defines a container for an external (non-HTML) application
<fieldset></fieldset>		Groups related elements in a form
<figcaption></figcaption>	5	Defines a caption for a <figure> element</figure>
<figure> 5</figure>		Specifies self-contained content
		Not supported in HTML5. Use CSS instead. Defines font, color, and size for text
<footer> 5</footer>		Defines a footer for a document or section
<form></form>		Defines an HTML form for user input
<frame/>		Not supported in HTML5. Defines a window (a frame) in a frameset
<frameset></frameset>		Not supported in HTML5. Defines a set of frames
<h1> to <h6></h6></h1>		Defines HTML headings
<head></head>		Defines information about the document
<header></header>	5	Defines a header for a document or section
<hgroup></hgroup>	5	Groups heading elements
<u><hr/></u>		Defines a thematic change in the content
<html></html>		Defines the root of an HTML document
<u><i></i></u>		Defines a part of text in an alternate voice or mood

<iframe></iframe>		Defines an inline frame
		Defines an image
<input/>		Defines an input control
<ins></ins>		Defines a text that has been inserted into a document
<kbd></kbd>		Defines keyboard input
<keygen/>	5	Defines a key-pair generator field (for forms)
<label></label>		Defines a label for an <input/> element
<legend></legend>		Defines a caption for a <fieldset> element</fieldset>
<u></u>		Defines a list item
k>		Defines the relationship between a document and an external resource (most used to link to style sheets)
<main></main>		Specifies the main content of a document
<map></map>		Defines a client-side image-map
<mark></mark>	5	Defines marked/highlighted text
<menu></menu>		Defines a list/menu of commands
<meta/>		Defines metadata about an HTML document
<meter></meter>	5	Defines a scalar measurement within a known range (a gauge)
<nav></nav>	5	Defines navigation links
<noframes></noframes>		Not supported in HTML5. Defines an alternate content for users that do not support frames
<noscript></noscript>		Defines an alternate content for users that do not support client-side scripts
<object></object>		Defines an embedded object
<u></u>		Defines an ordered list
<optgroup></optgroup>		Defines a group of related options in a drop-down list
<option></option>		Defines an option in a drop-down list
<output></output>	5	Defines the result of a calculation
<u></u>		Defines a paragraph
<param/>		Defines a parameter for an object
<pre><</pre>		Defines preformatted text
<pre><pre><pre><pre><pre><pre><pre><pre></pre></pre></pre></pre></pre></pre></pre></pre>	5	Represents the progress of a task
<u><q></q></u>		Defines a short quotation
<u><rp></rp></u>	5	Defines what to show in browsers that do not support ruby annotations
<u><rt></rt></u>	5	Defines an explanation/pronunciation of characters (for East Asian typography)

≤ruby≥ 5 Defines a ruby annotation (for East Asian typography) ≤S≥ Defines text that is no longer correct ≤samp≥ Defines sample output from a computer program ≤script≥ Defines a client-side script ≤section≥ 5 Defines a section in a document ≤select≥ Defines smaller text ≤source≥ 5 Defines multiple media resources for media elements (<video> and <audio>) ≤span≥ Defines multiple media resources for media elements (<video> and <audio>) ≤span≥ Defines a section in a document ≤strike≥ Not supported in HTML5.
